

ADGA GROUP CONSULTANTS INC. ANNOUNCES ACQUISITION OF PRESIDIA SECURITY CONSULTING

Second acquisition in thirty days for Ottawa-based company

OTTAWA, April 3, 2018 - ADGA Group Consultants Inc. is pleased to announce the acquisition of Presidia Security Consulting – this marks the second acquisition in four weeks for the privately-owned, Canadian company with headquarters in Ottawa, Ontario.

“I am proud to welcome Presidia to the ADGA Group,” says Françoise Gagnon, CEO of ADGA Group Consultants Inc. “This acquisition enhances our rapidly growing *Converged Security Solutions™*, providing our clients with the highest-quality of trusted, unique, end-to-end security systems management solutions.”

Presidia provides security, investigation, intelligence and emergency management solutions to the public and private sectors. Presidia is considered at the forefront of industry with a team of highly-experienced individuals delivering superior executive protection, risk mitigation, emergency preparedness, investigations, training and security program management.

“Our team members have contributed to inter-agency committees at the Municipal, Provincial, and Federal Government levels, and have worked closely with many other international decision-making bodies,” says Stephen Moore, President of Presidia Security Consulting. “Like ADGA, we are wholly-committed to helping Canada protect its people and operations – at home and abroad.”

Presidia Security Consulting

Presidia’s headquarters is located in Canada’s Capital Region. With proven success at all levels of government (including the Canadian Armed Forces), Presidia has subject matter experts in the fields of domestic and international policing, as well as Departmental and Corporate security. As former executives within the Canadian security and law enforcement community, the Principals of Presidia Security have led the development of strategic research and policy documents and have implemented innovative solutions that are now cornerstones of key business processes.
